

Figure 1: Content Modules

	Module 1: Mind & Machine	Module 2: Mechanisms of Learning	Module 3: Communication & Collaboration
	The computer as mechanical object – transcending the friendly interface to which we are accustomed.	Initiatives resulting from the University's commitment to developing technology to facilitate learning.	Development of information technology from computation to communication.
Accomplishments Through Technology			
Impacts & Risks of Pioneering Technology			
Virtual Exhibit Approach	MIDAC	CRISP	MTS
	Virtual-reality construction of the MIDAC and archival resources	Phone-in interface with oral histories from students and developers	Web-based developing interface with interactive video; opportunity to communicate with the museum
