Worksheet problems

(Hand these questions in!)

- Worksheet #21 Problems 2, 3.
- Worksheet #22 Problems 2, 4.

Assignment questions

(Hand these questions in!)

1. This question is **for credit.**
   Complete your course evaluation. Do not share your responses (those are anonymous!) but upload a screenshot of the submission confirmation page to Gradescope.

2. **(Bonus)**. Choose one part of Homework #10, Problem 6. Ask the question to your preferred AI system, and ask the AI to give a full justification of its solution. Then, grade its answer. You should indicate which AI system and version you used, and include the full printout of your discussion with the AI. Perform an evaluation of its solution, including whether its answers are correct, whether the justification was complete and correct, and whether the writing is mathematically precise. Describe your impression of the overall quality of its work.

   Remark: Last time I assigned a class a task of this form, ChatGPT did the majority of the math problems incorrectly. I am interested to see whether it has improved since then!
